ResearchIt is a hub for Researchers both who are and who want to be. Our platform's sole purpose is to enable students/researchers to share research papers, clarifications and doubts regarding the same via text or can link or state a particular part of the paper to ask for clarifications. And receive answers by replying to that particular post.

List of functionalities:-

- Filters for easy access of the topics you want
- Follow your friends / researchers to know when they post something(posts of friends or following researchers will appear on top, as a priority)
- Can attach video links and document links for reference(hyperlinks)
- Comments section for each post or question is a mini discussion forum
- Highlights the status of the questions asked in your dashboard
- Can like or dislike a post/question or a comment/answer
- Track your activity in your dashboard
- Dashboard is a One place reference to all the questions asked and all the discussions you've taken part in
- List of likes you've received, number of times someone hovered over your answer or question, basically summary statistics.
